ABOUT US

Why?

Empowering small and medium businesses with the security they deserve! Protection shouldn't be a privilege reserved for the giants.

How?

Uncovering digital risks, one digital asset at a time - protecting your business as a whole.

What?

We offer comprehensive pentest audit services, helping companies identify and mitigate security vulnerabilities in their digital assets.

DID YOU KNOW?

Vulnerability Exposure

of industrial networks in the MENA region have known vulnerabilities.

Source: [CloudSEK | Predicting Cyber Threats](#)

Ransomware Attacks

increased in 2023 in MENA region, heavily impacting critical sectors like energy, banking, and healthcare.

Source: [CloudSEK | Predicting Cyber Threats](#)

AV. Data Breach Cost

\$6.1 M

in the MENA region which is significantly higher than the global average of \$4.45 million.

WHY IT'S ESSENTIAL FOR YOUR BUSINESS

Investing in penetration testing uncovers hidden vulnerabilities, enhances risk management, boosts confidence in your security measures, and significantly reduces the impact of potential breaches. Safeguard your digital assets and ensure a secure and resilient online environment.

RETURN ON INVESTMENT

Comparing the cost of a penetration test to the \$6.1M average cost of a data breach shows significant savings.

FULFIL SECURITY REGULATIONS

Ensure compliance with security regulations through our expert solutions.

RISK ASSESSMENT

Reduce your company's risk by addressing threats before they become problems.

MARKET EDGE

Provides a competitive edge by offering enhanced security services.

PENETRATION TESTING

At WavaSec

We offer comprehensive penetration testing services utilizing expert manual testing and advanced automated scanners to identify vulnerabilities in your web applications.

We provide **detailed reports** outlining the discovered vulnerabilities, their potential impact, and actionable recommendations on how to tackle them.

Our service includes a thorough presentation of **findings through an executive meeting**, ensuring clear communication and understanding.

Additionally, we offer **re-testing** to confirm that all issues have been effectively resolved, giving you peace of mind and a fortified digital presence.

Methodology & Standards

- OSTTMM (Open Source Security Testing Methodology Manual)
- OWASP (Open Web Application Security Project)
- ISSAF (Information Systems Security Assessment Framework)
- WASC-TC (Web Application Security Consortium Threat Classification)
- PTF (Penetration Testing Framework)
- OISSG (Information Systems Security Assessment Framework)
- NIST SP800-115 (Technical Guide to Information Security Testing and Assessment)

Use penetration testing as your first line of defense.

Proactively assess applications to identify vulnerabilities, such as those that could lead to the loss of sensitive user and financial information.

OUR PROCESS

1

CONSULTATION

To help understand your specific needs and challenges through in-depth discussions to tailor our cybersecurity services to your requirements.

2

SCOPING

Define the project scope and establish clear timelines to ensure a structured and timely approach for an effective penetration testing strategy.

3

VULNERABILITY DISCOVERY

Our team meticulously scans and analyzes your systems through comprehensive assessments to uncover security weaknesses and potential exploits.

4

REPORTING & ADVISORY

We compile detailed findings, provide actionable recommendations, and review the results with your team to enhance security measures.

5

RETESTING

After implementing the recommended fixes, we perform retesting to ensure all vulnerabilities have been effectively resolved.

SAMPLE REPORT

Executive Summary

Provides a high-level overview of identified risks, their associated vulnerabilities, and the potential impact on your organization.

Statistics and Risk

Presents a quantitative breakdown of the identified vulnerabilities to help prioritize remediation efforts and facilitate informed decision-making on security improvements.

Vulnerability Details

Offers an in-depth analysis of all discovered vulnerabilities, including technical descriptions, severity levels, and step-by-step remediation guidance.
